

**Key Information Document-Physical Shares**

**Purpose**

This document provides you with key information about this investment product. It is not marketing material and it does not constitute an investment advice. The Key Information Document is required by the law to help you understand the nature, risks, costs, potential gain and losses of this product and to help you compare it with other financial products.

**Product**

**Product name:** Physical Shares

**Distributor:** Offered by Wonderinterest Trading Ltd. (the "Company") a company registered in Cyprus with registration number HE332830 and authorised by Cyprus Securities and Exchange Commission ("CySEC"), with Licence Number 307/16.

**Alert:** You are about to purchase a product that is not simple and may be difficult to understand.

**What is this product?**

**Type**

A Physical Share is not a leveraged product and it is offered by the Company on a bilateral execution basis. It allows the investor to obtain a direct exposure to the Physical Share and so to become a shareholder of the particular Company whose share has been purchased. Physical shares can only be purchased via the trading platform as the 'BUY' option and the investor may benefit from rising prices on the Stock Exchange. The price of the Physical Share is an exact representation of the price of the share on the relevant primary exchange.

**Example**

If an investor has opened a BUY position and the price of the share on the Stock Exchange rises, the value/price of the Physical Share will increase - at the time of closing the position the Company will pay the difference between the closing price and the opening price. Conversely, if the price of the share on the stock exchange declines, the value/price of the Physical Share will decrease - at the time of closing the position the investor will pay the Company the difference between the closing price and the opening price.

**Objectives**

The aim of the Physical Share is to allow an investor to become a shareholder of particular Company without the need to be official participant of the stock exchange on which the Company is being quoted.

Physical Share	Margin (%)	Market Price	Position size	Initial Margin	Direction	Close price	Percentage	Total Commission Open/Close	Management fee	Profit/Loss (USD)
AAPL	100%	130 USD	500	65 000 USD	BUY	135 USD	+3.84%	1325	-17.80	1 157.20
MSFT	100%	250 USD	500	125 000 USD	BUY	255 USD	+2%	2525	-34.27	-59.27

Physical Shares carry a different stop-out level than CFDs and they are traded with no leverage.

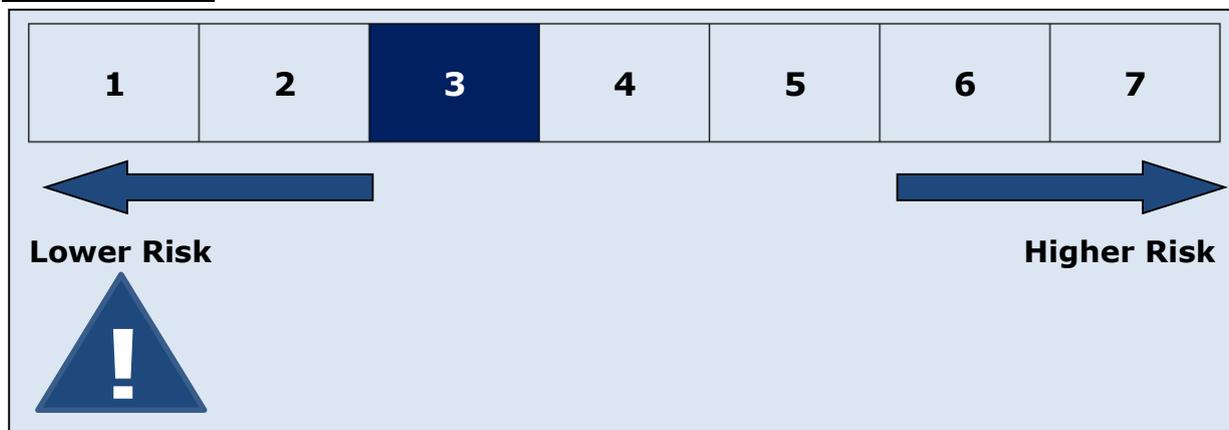

When free margin drops due to price movement in the opposite direction of the trades, the investor must either fund the account in-order to keep margin level above stop out (automatic system close of open order) level which is at 0% of margin level, or close position(s) to avoid being stopped out, i.e., automatic close of open positions. Margin Call notification is communicated through a durable medium when margin level falls below 100 %.

**Intended Retail Investor**

Physical shares are available for investors who have less knowledge for the financial markets and they are expected to have less trading experience with the financial markets. It is anticipated that the investors will have an understanding on how the moving price of the Physical Share on

the primary stock exchange affects the open positions of their account. Moreover, they must understand that trading Physical Shares might cause a loss of significant part of invested capital and they must have the ability to bear losses.

### **Risk Indicator**

The Risk indicator represents the risk involved in these products compared to other products.

It illustrates the possibilities of how a products movement can lead to financial loss for the investor. The Risk indicator has been set to the Lower level. The rate indicates the potential losses from the product future performance. The risk indicator assumes that the investor may not be able to BUY or SELL the Shares at the price desired due to market volatility or the investor may have to BUY or SELL the Shares at a price that significantly impacts the anticipated profitability of the shares.

### **Currency Risk**

It is possible to buy or sell Physical Share in a different currency from the currency of your account. The final pay-out that you might receive depends on the exchange rate between the two currencies.

### **Performance Scenarios**

The below scenarios were demonstrated to provide information on how an investment may perform. This allows for comparisons between other products scenarios in order to identify which product is more suitable. The scenarios presented are an approximate future performance based on evidence from the past performance on how the value of this investment differs and are not an exact indicator.

The outcome will be based on the market performance and how long the position is held on a particular Physical Share. The stress scenario indicates the possible outcome in extreme market circumstances. **Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent return. Actual returns could be lower.**
